

# Flip Chart Instruction

Print out the flip chart provided. Glue or laminate the pictures and text to construction paper and bind the pieces together with a spiral spine, use a binder, or purchase a flip chart like the one below. Be sure to glue or laminate the text for each step on the page. When completed, the flip chart should allow the teacher to show the picture to the students on one side of the chart and the text for the picture is on the back of the chart facing the teacher, enabling the teacher to read the text that explains the picture while the students are looking at the pictures.

Example of the table flip chart that could be purchased.
